

PRESS RELEASE

KPG Corporation Forms Partnership with SEI Laser Converting

February 2010 - KPG Corporation, formerly Ko-Pack, is very pleased to announce its newly- formed partnership with SEI Laser Converting, Italian manufacturer of the fastest laser for die-cutting labels.

SEI Laser Converting offers numerous laser possibilities to enhance printing operations. Browsing the SEI web site www.seiconverting.com provides comprehensive overviews of their sophisticated and diverse laser equipment for laser-cutting, combining cutting and marking, and laser-marking engraving. SEI technology offers the elimination of dies, added versatility, and the option to operate both offline and inline. With the explosion of digital presses, it presents the perfect solutions for die-cutting short-run labels with no tooling costs. Working from a digital file, set-up time and start-up waste are virtually eliminated.

John Warwick, President of KPG Corporation said, “KPG is very excited about its partnership with SEI Laser Converting and introducing their technology to U.S. and Canadian printing markets. With its high-end laser equipment, we anticipate an enthusiastic response from printers looking ahead to expanding their production capabilities and strengthening their competitive edge within the marketplace. Plans are in the works for a major display of running equipment at Labelexpo in Chicago, September 14-16.”

About KPG Corporation

KPG continues its tradition of inventive printing representing manufacturers of first-class equipment, in addition to SEI. KPG represents SMAG – manufacturer of web finishing equipment for digital presses -- roll-to-roll, inspection and converting, post-digital printing, flat-screen printing, foil-stamping, and flatbed and semi-rotary die-cutting;

GIDUE Nuova Castagnoli - manufacturer of in-line, combination, narrow-web presses; and Interface – manufacturer of wide-web, central impression, solvent and water-based flexo presses. KPG also offers narrow-web, central impression, UV flexo and UV letterpress equipment, as well as selling pre-owned machines.

Email or call us for specifics on any of the above progressive printing equipment manufacturers as they apply to individual printing needs:
